My permissions are usually NOT wrong when I look at them So considerably under the brand-new user accounts I can today use Keynote, but under my regular account I can only conserve Keynote documents to iCloud.. @@ -1,7 +1,54 @@ sparkly 0 6 0 99 shiny 0 7 0 99 - shiny 0 7 0 - Stopped delivering websocket subprotocol.. This repairs a compatibility problem with Search engines Chrome 30 The 'input' and 'result' items are today also available via 'session$input' and 'program$output'.

The same message springs up about not having permissions usually. Essentially, the problem is definitely that I will consider to, for instance, open a picture with Survey, and it states I wear't possess permission to perform therefore.. Okay, so I've been getting this problem ever since I changed to Un Capitan I've attempted resetting ACL stuff, migrating to a fresh user account, re-installing the Operating-system, (among additional stuff) and nothing helps.
